

 **TOYOTA PRADO**
oh what a *feeling!*

Refined power, refined intelligence

Refined power, refined intelligence.

There is a vehicle which gives you a new sense of power and the freedom to go further than you may have thought possible. At the same time, it provides the quality of interior appointments and a refined ride expected by discerning drivers.

Created by one of the world leaders in four wheel drive technology, Toyota Prado has been equipped with cutting edge ideas which allow you to seek out more fulfilment from your leisure time and from life. Its styling reflects a rugged sophistication that's equally suited to the high street as the high trails. Prado is also a hard worker with the addition of a Prado Standard model in the line-up, a vehicle that's been designed with plenty of practical features.

New technologies that optimise control.

Prado is equipped with intelligent Driver Assist Technology (DAT) that helps prevent any minor drama becoming a major crisis. In Grande and VX, DAT constantly analyses your driving conditions then takes the necessary actions to optimise control while cornering or accelerating, and improves grip in demanding conditions.

For these models, DAT also means easier starting on hilly terrain, greater comfort wherever you go and helps you negotiate steep descents, while the Grande model lets the vehicle rise above undulating terrain, or lowers for a combination of on-road excellence and off-road performance.

The DAT on the GXL, VX and Grande models also includes Advanced Braking with intelligence (AB-i) which integrates the Anti-skid Braking system, Brake Assist (BA) and Electronic Brake-force Distribution (EBD). AB-i delivers improved braking and control in a range of challenging situations, from emergency stops to braking on slippery surfaces.

#ParkAssist is designed as a driver assist device only and should not be used as a substitute for skilled driving and safe parking practices. The area into which the vehicle is to be reversed must be visually monitored by the driver while parking.

Grande Model shown

Styling that meshes function with form.

Appealing to the sophistication of today's more discerning drivers, Prado displays an elegance not commonly seen on traditional 4WD vehicles. Flowing curves more akin to those seen on certain sedans set Prado apart, a testimony to its design origins in Toyota's avante garde ED2 styling studio on the French Riviera.

The neat, uncluttered styling of the interior helps keep you both informed and in control. Appealing to your sense of taste as much as your love of driving, the interior design treatment is confident and bold. Muscular sculpting of interior mouldings results in an ambience with a strong sense of purpose yet a clean sense of refinement. Here in the great indoors, Toyota designers have cleverly blended luxury car styling cues with the more practical requirements of an all terrain vehicle.
